**Notice of Intent to Issue a Request for Proposals
2024 Entergy Mississippi, LLC Existing Resource Energy & Capacity RFP**

Entergy Services, LLC (“ESL”), hereby provides notice to interested parties that it intends to issue a Request for Proposals for Capacity and Energy from Existing Generation Resources (the “RFP”) on behalf of Entergy Mississippi, LLC (“EML”). ESL expects to issue the RFP as early as May 2024. RFP documents will be posted to ESL’s website for the RFP, <https://spofossil.entergy.com/ENTRFP/SEND/2024EMLExistingResourceRFP/Index.htm>. EML plans on holding a Bidders Conference shortly after the RFP documents are posted. Interested participants should monitor the RFP website for information about the Bidders Conference, including the date, time, and location. Proposals responsive to the RFP may be due as early as June 2024.

Through the RFP, EML would seek to obtain power purchase agreements (“PPAs”), tolling agreements (“Tolls”), asset acquisitions (“Acquisitions”), and capacity-only purchase (“Capacity Credit”) agreements from existing generation resources. For PPAs, Tolls, and Acquisitions, the existing generation resources would be required to be fueled by natural gas and to generate power from the resource’s combined-cycle gas turbines, simple-cycle combustion turbines, or, excluding for Acquisitions, steam turbines. For Capacity Credit agreements, the eligible existing generation resources are expected to include qualifying natural gas-fueled and renewable facilities.

The window for product deliveries under the solicited PPAs, Tolls, and Capacity Credit agreements would be June 1, 2026, through May 31, 2033. The minimum product delivery period would be one full season as defined by the Midcontinent Independent System Operator, Inc. (“MISO”) tariff. Any proposed Acquisition would be required to be consummated on or before December 1, 2026.

EML would prefer that the capacity proposed to be purchased at any point in a PPA or Toll arising out of the RFP be at least 50 MW (measured under summer reference conditions). For Capacity Credit agreements, EML would prefer that the average capacity credit purchase and sale commitment over all seasons in each MISO planning year be at least 5 MW.

Acquisition resources proposed for the RFP would be required to be physically located within the geographic region defined as local resource zone (“LRZ”) 10 of MISO South (“LRZ 10”). EML would prefer that the generation resources for PPAs, Tolls, and Capacity Credit agreements proposed for the RFP be physically located within LRZ 10, but EML would allow generation resources for those transactions to be physically located within LRZ 8 or LRZ 9 of MISO South. Any resource location question should be directed to the Bid Event Coordinator (see the final paragraph below).

The RFP would preclude consideration of any self-build option that may be submitted on behalf of EML or any proposal that may be submitted by Entergy Regulated Affiliates or Entergy Competitive Affiliates.

Any transaction emerging from the RFP would be subject to EML's receipt of all regulatory approvals on terms acceptable to EML in its sole discretion and other conditions precedent.

The registration process contemplates that Bidders would be required to register each PPA, Toll, Acquisition, or Capacity Credit agreement proposal with EML and for each proposal pay, in advance of the RFP's proposal submission period, a proposal submission fee of \$10,000 if the proposal is for a PPA, Toll, or Acquisition or \$5,000 if the proposal is for a Capacity Credit agreement. For PPAs, Tolls, and Capacity Credit agreements, the proposal submission fee will be reduced to \$1,000 only if the proposal is identical in all material respects, except for deliverability term and price, to a proposal for which Bidder registered and paid the requisite proposal submission fee in the 2024 Request for Proposals for Energy and Capacity from Existing Resources for Entergy Texas, Inc. Any alternative proposal submitted into the RFP (e.g., a proposal containing alternative pricing, alternative completion dates, or alternative transaction structures) would be required to be registered as a separate proposal.

All dates and time periods referenced in this notice are subject to change. This notice is intended in part to give prospective bidders interested in participating in the RFP advance notice of the RFP. While EML expects to issue the RFP, by publishing this notice EML is not assuming, and expressly disclaims, any obligation or commitment to issue the RFP or any other obligation or liability of any kind of EML that could result from or arise out of this notice.

EML has engaged Mr. Brandon Meyer of ESL to serve as the Bid Event Coordinator for the RFP and Mr. Harold Judd of Accion Group, LLC, to serve as the Independent Monitor. Mr. Judd can be reached via email at IM-2024EMLRFP@acciongroup.com. Questions about this notice or the RFP should be directed to the Bid Event Coordinator of the RFP at EMLRFP@entergy.com and to Mr. Judd at the referenced email address.
