## **Appendix G Supplier Information**

Bidder will be required as part of its Proposal Package to provide evidence of the strategies it utilizes or intends to implement to increase the capacity and scale of, or otherwise promote the development of, local businesses that contribute to the economic growth of the communities served by Bidder and Bidder's Affiliates. Bidder should include in its response a completed version of Exhibit A (attached) identifying local contractors or subcontractors of Bidder or its Affiliates that are under contract (or are planned to be under contract) to provide contract goods or services for the proposed resource. ESL and ETI request that proposals submitted in this RFP indicate the level (expressed as a percentage) of Contracted Spend (defined below) during construction that is expected with local suppliers and also the extent to which Bidder will guaranty the stated Contracted Spend levels in any Definitive Agreement. This information and other related information requested in Appendix C to this RFP (including item 3.10 in Appendix C) may be considered by ETI in selecting resources from this RFP. However, nothing contained in this Appendix H is intended to imply or impose any obligation on the part of Bidder to pay a premium for the utilization of Historically Diverse (HD) or local suppliers. Consistent with good business practices, Bidders should address these objectives while maintaining competitive prices for goods and services procured from all suppliers and vendors.

In addition, Bidder will be required to provide as part of its Proposal Package evidence of its environmental stewardship. Such evidence could include evidence of its environmental policies or programs; a Supplier Code of Conduct utilized by Bidder; its or any parent's waste targets and Energy/Green House Gas reduction targets; significant environmental achievements of Bidder or a parent thereof; and other practices or efforts of Bidder or its parent(s) to support social responsibility best practices, community engagement, sustainability and other environmental goals or objectives.

A “**local**” supplier is generally defined for purposes of this Appendix H as a supplier that has an office located within the State of Texas or any of the other states in which the Entergy regulated utilities operate (Arkansas, Mississippi, Texas and Louisiana) and engages in business in such state through that office.

“**Contracted Spend**” means, with respect to a contract with a local supplier for goods or services for the proposed project, the total dollar value of the contract based on the contract's pricing and related terms, including, if and as applicable, reasonable value assumptions for items with variable cost elements such as quantities, staffing composition/numbers, and pricing..

### Contract Requirements for Local Contracted Spend

If Bidder's proposal indicates that Bidder will use local suppliers, the Definitive Agreement between ETI and Bidder selected to provide products and services under the RFP will contain, at a minimum, the following key terms:

(i) Seller will be required to comply with a contracting plan for the retention of, and target Contracted Spend for local suppliers.

(ii) In the event of non-compliance with the plan, Seller may be required to take corrective actions to ensure Seller's adherence to the plan and Buyer may have other remedies to be included in the applicable Definitive Agreement.

**Appendix G**  
**Supplier Information**

(iii) Seller may be required to participate and provide information and materials for periodic performance review meetings with ETI.

(iv) Seller may be required to provide quarterly reports of local supplier spending and provide data and other inputs to or for use in ETI's local supplier performance tracking tool.
