

2010 Renewable RFP – Phase II Results

ESI has concluded its Phase II review and evaluation of the proposals submitted in response to the 2010 Renewable RFP and has reported the results of the review and evaluation to the Operating Committee. ESI has received Entergy Operating Committee approval for a total of 14 proposals to be further evaluated in Phase III, representing total capacity of approximately 767 MW. The 14 shortlisted proposals represent a mixture of as available and baseload products, technologies, and geographic locations.

Phase III of the 2010 Renewable RFP is expected to be completed in November 2011, resulting in a Primary and Secondary Selection list.
