

NOTICE OF UPDATE TO PROVIDE TRANSMISSION COSTS

After review of the current Representative Schedule included as Appendix F, ESI has decided to amend the schedule in relation to the May 4, 2011 deadline to provide updated interconnection costs, off-system transmission costs, and distribution costs (if any) associated with the proposal(s). One of the benefits of this amendment will be additional time for bidders to provide more accurate information in the areas mentioned above.

The former deadline of Wednesday, May 4, 2011 will be rescheduled and extended for at least two weeks. A definitive new deadline is expected to be posted by the close of business on May 4, 2011.

Although the deadline itself has changed, the information required will still be generally the same.
