Execute Definitive Agreements	Mar 2012
Target for Receipt of Regulatory Approvals	4th Quarter 2012
Target Delivery Term Start Date	2012-2014

After meeting with ESI earlier this week, Louisiana Public Service Commission (LPSC) Staff issued a notice on December 1, 2010, advising interested parties of ESI's intention to issue final RFP documents on or about the week of December 6, 2010. Like the LPSC, ESI encourages interested parties to review the draft RFP documents posted in early November and submit any additional comments on the documents to the RFP Administrator at [esirenewable@entergy.com](mailto:esirenewable@entergy.com) as soon as possible. The final RFP Term Sheets are expected to be similar to the currently posted draft Term Sheets with the exception of a few items that ESI is working through with the LPSC Staff. As the LPSC's notice indicates, the final RFP documents are not expected to change after they are posted, so it is important for bidders to provide their comments prior to their publication. Clarifying questions will be allowed until two weeks before the start of the Proposal Submission Period, but will not result in modifications to the final RFP documents.

ESI will continue to update its RFP website with documents, notices, and bidder registration instructions related to the progress of this RFP. Please refer to <https://emo-web.no.entergy.com/ENTRFP/Renewable/RenIndex.html>.
